INTRODUCTION

The Scottish Government as Managing Authority has developed these rules in accordance with EC Regulation 1303/2013 Article 65 Para 1, which states:

“The eligibility of expenditure shall be determined on the basis of national rules, except where specific rules are laid down in, or on the basis of, this Regulation or the Fund-specific rules.”

The rules take account of the general and respective fund regulations (as amended). Principally, these are EC Regulations 1303/2013 (the Common Provisions Regulation - sometimes referred to as the General Regulation), 1301/2013 (ERDF) and 1304/3013 (ESF). They apply to all projects approved under the 2014-2020 Operational Programmes. The EC Regulations are available here:

The purpose of these rules is to distinguish clearly between eligible and ineligible costs, and to ensure that only eligible activity/expenditure features in applications and ultimately claims. While every effort has been made to produce clear guidance on eligibility, there remains an onus on applicants to apply for grant responsibly and reasonably and to ensure compliance – in cases of doubt; clarification should be sought from the Scottish Government.

The rules apply to all operations funded under the European Structural Funds and must be followed by all beneficiaries.

This guidance is structured as follows:

- Section 1 - General Principles
- Section 2 - Simplified Cost Options
- Section 3 - Actual Costs
- Section 4 - Eligibility of Expenditure
- Section 5 - Ineligible Costs
SECTION 1 – GENERAL PRINCIPLES

1. Responsibilities of Lead Partners and Delivery Agents

Guidance on the responsibilities of Lead Partners and Delivery Agents is available in the Roles and Responsibilities section of the Programme Guidance.

1.1. Geographical Flexibility

As a general rule, operations receiving grant from the Structural Funds should be located in the Programme Area. At operation level, activity outside the Programme Area may be eligible if the operation would have difficulty in achieving its objectives otherwise. Additionally, participants who are employees are eligible on the basis of the location of their employer/employment.

1.2. Fund Flexibility

While there is a general presumption against using the flexibility between funds provided for in the Regulations, we will consider on a case by case basis applications that seek to integrate ERDF and ESF eligible activities within one project and under one fund. The 10% flexibility effectively relates to spend. At a practical level, this means that ESF (or ERDF) may, with prior agreement of the Managing Authority, be spent on what would normally be eligible ERDF (or ESF) activities. Such flexibility will be limited to a maximum of 10% of approved eligible costs of the Operation, which will be required to be monitored throughout its life.

1.3. Need for Structural Funds

The Structural Fund contribution should be the minimum amount required to allow the operation to proceed. To this end, additionality, must be clearly evidenced for each operation.

1.4. Match Funding

The match funding is the amount of funding secured from other sources in order to deliver the Strategic Intervention or Operations.

Match funding should normally be committed and evidenced at the Operation Application stage. However, if the Lead Partner has indicated annual match funding commitments, these are eligible if that is how the organisation receives its funding and will have to be reconfirmed and evidenced on an annual basis during implementation. In the case of Challenge Funds, involving funding rounds where the delivery organisation supplies match funding, the Lead Partner will have to confirm and evidence this match funding when known.

European Funding of any kind cannot be used as match funding and match funding cannot be linked to achievements of other outputs it is the Lead Partner’s responsibility to confirm this is not the case.

Match funding must be in the form of a direct cash contribution or expenditure incurred i.e. by delivering units or incurring actual costs through procured services/flat rate methodology.
Applicants must declare any other funding streams that they receive which relates to the activity being funded by ESF.

1.5. **Simplified Cost Options**

The 2014-2020 Programme will see a significant shift towards simplification, and a move away from using only actual costs. The following cost options will be available:

- unit costs
- actual costs (procurement and grant schemes)
- flat rate models

See Section 2 for full details of these cost models and their practical application.

1.6. **Evidence of Expenditure**

If using actual cost or flat rate models, all expenditure must be supported by a fully transparent audit trail through to bank statements, including transaction lists, invoices and BACS listings. In certain circumstances, and with prior agreement of the MA, documents of equivalent probative value may be accepted. For example:

- salaries must be supported by payroll records, BACS lists and bank statements,
- capital works costs must be supported by works certificates issued in accordance with the provisions of the signed contracts,

Where original documentation is available only in electronic format, print offs or ‘screen shots’ should be retained.

Grant fund managers are under an equivalent obligation to maintain a properly vouched audit trail of payments by them in respect of activities and/or investments supported by ERDF.

All expenditure must be incurred and defrayed (i.e. left the bank account) before it is included in any claim. Notwithstanding this requirement, payroll costs may be claimed ‘gross’ and include associated National Insurance, superannuation and PAYE.

1.7. **Evidence of Outcomes**

For all cost models, lead partners must be able to demonstrate that all outcome activity has been achieved prior to submission of a claim. For example:

- signed registration form,
- record of engagement with SME or participant,
- certificate or other evidence of qualification,

ESF Participant Guidance and Final Recipient Organisation Guidance in the Programme Guidance details minimum requirements that must be adhered to.
1.8. **Procurement**

Contracting for the provision of works, materials and/or services is eligible. Applicants should pay particular regard to and comply with the thresholds for publishing invitations to tender in the Official Journal of the EU and (Scottish) national procurement rules.

Contracts must either be competitively tendered or procured in line with an organisation’s standing orders and/or procurement policy to ensure value for money.

Use of single source awards must have prior approval by the Managing Authority.

Please refer to the following website for further guidance:

http://www.gov.scot/Topics/Government/Procurement

1.9. **State Aid**

State Aid Rules must be complied with.

Please refer to the following website for further guidance:

http://www.gov.scot/Topics/Government/State-Aid

1.10. **Financial Engineering Instruments (FEIs)**

Please refer to the following website for further guidance:

http://www.eprc.strath.ac.uk/eprc/research_financial_instruments.php

1.11. **Publicity**

ESF/ERDF support must be acknowledged on all project related documentation through use of the appropriate logos.

See Publicity section of the Programme Guidance.

1.12. **Income and Revenue**

Please see Article 65 in EC Regulation 1303/2013

1.12.1. **Project Income**

Income can accrue immediately (ERDF and ESF) for the duration of the project (ERDF and ESF), for example from services, enrolment/tuition fees or other equivalent receipts representing income. This reduces the net cost of projects and thereby the amount of Structural Funds grant required for the project in question.

Applications must estimate income likely to be generated by the project and claims must show clearly actual income received which will be deducted from the claim.

1.12.2. **Revenue Generation**

ERDF capital projects have the potential to generate net revenue following completion, for example through the charging of rent. Article 61 of the Council
1.13. **Winding Up or Liquidation**

In the event of, or proposed, winding up or liquidation of a lead partner or delivery agent, the Managing Authority should be advised as soon as possible. Catalogued archives of project documents should be retained. Documents must not be destroyed and should be retained in line with the document retention guidelines below.

1.14. **Document Retention**

See Document Retention section of the Programme Guidance.

1.15. **VAT**

Non-recoverable VAT is eligible. A letter confirming VAT status must be provided i.e. from HMRC or accountants.

1.16. **Article 71 Durability of Operations**

1. An operation comprising investment in infrastructure or productive investment shall repay the contribution from the ESI Funds if within five years of the final payment to the beneficiary or within the period of time set out in State aid rules, where applicable, it is subject to any of the following:
   (a) a cessation or relocation of a productive activity outside the programme area;
   (b) a change in ownership of an item of infrastructure which gives to a firm or a public body an undue advantage;
   (c) a substantial change affecting its nature, objectives or implementation conditions which would result in undermining its original objectives.

Sums unduly paid in respect of the operation shall be recovered by the Member State in proportion to the period for which the requirements have not been fulfilled. Member States may reduce the time limit set out in the first subparagraph to three years in cases concerning the maintenance of investments or jobs created by SMEs.

2. An operation comprising investment in infrastructure or productive investment shall repay the contribution from the ESI Funds if within 10 years of the final payment to the beneficiary the productive activity is subject to relocation outside the Union, except where the beneficiary is an SME. Where the contribution from the ESI Funds takes the form of State aid, the period of 10 years shall be replaced by the deadline applicable under State aid rules.

If your operation comprises of investment in infrastructure or productive investment and any of the above apply you must notify the Managing Authority immediately as recovery of EU Grant may apply.
1.17. Approval of Operations

An operation that has been fully implemented/fully completed at the time of application is ineligible.

1.18. Challenge Funds

A challenge fund may be an appropriate method of delivering support via a competitive application process. Please refer to the separate guidance note under the Programme Guidance section of the website.

SECTION 2 – SIMPLIFIED COST OPTIONS (SCOs)

This section sets out the two simplified cost options available i.e. standard scale-of-unit costs and flat rate models.

2.1. Standard Scale-of-Unit Costs

COCOF paper 09/0025/04-EN states that Unit Costs are paid:

“…on the basis of quantified activities, outputs or results multiplied by standard scale-of-unit costs established by the Member States. The option can be used for any type of grant, project or part of project, when it is possible to define quantities related to an activity and standard scale of unit costs. Standard scales of unit costs apply typically to easily identifiable quantities, such as training hours, training days, certificates obtained, training modules finalised, consultant hours worked, hotel nights, or meals.”

Article 67, Paragraph 5(a) of EC Regulation 1303/2013 states that the calculation of unit costs must be fair, equitable and verifiable and based on:

- Historical data
- Accepted current accounting practices
- Statistical data or other objective information (e.g. representative samples, information from other EU funded or national programmes)

In addition, all unit cost calculations must be agreed with the Managing Authority prior to their use.

There is no requirement for audit of underlying financial documents. All claimed outcomes will be subject to verification and must be fully evidenced.

A number of standard scales-of-unit cost models are under consideration by the Managing Authority for potential use under a number of priorities in both the ERDF and ESF operational programmes. Details of these will be notified when available and the National Rules updated accordingly.

Please note that procured activity cannot use unit cost models - tenderers can be invited to bid for contracts on a unit cost price basis but these costs cannot be predetermined please refer to the actual cost section for further information.
2.2. **Flat Rates**

Article 68 of EC Regulation 1303/2013 states:

"Where the implementation of an operation gives rise to indirect costs, they may be calculated at a flat rate…"

The following options are available under the 2014-2020 ERDF and ESF Scotland Operational Programmes. The option chosen should be clearly justified in the application. A full audit trail for the direct costs needs to be retained. Applicants should refer to the European Commission guidance on simplified cost options for additional information on the applicable models:

**FLAT RATE OPTIONS**

<table>
<thead>
<tr>
<th>Flat Rate / Unit Cost</th>

<td></td>
<td></td>
</tr>
</tbody>
</table>

* It is expected that the majority of Operations will use 15% or 40% for indirect costs even though the Regulation states up to. If a Lead Partner considers that they require to use less than 15% or less than 40% they need to justify it in the cost model section of the Operation Application Form.

2.2.1. Direct Costs

What is a “direct cost”? 

**Direct costs** are those costs which are directly related to an individual activity of the entity, where the link with this individual activity can be demonstrated or is self-evident.

**Direct Staff Costs** - staff who work 100% on the delivery of Structural Funds activity will be deemed eligible. This includes staff salaries claimed as grant recipient costs within a Grant Scheme. This can either be on a full-time or part-time basis. Staff do not need to be in place for the full duration of an operation, as long as their role is justified and they are 100% on an operation for the period they are required. Allowances or salaries disbursed for the benefit of participants in ESF operations are not considered to be staff costs. Staff costs incurred through contracts for services such as consultancy services are not considered eligible under these flat rate options - these would be covered under the **procurement** option and paid as actual costs. Unpaid voluntary work is also not eligible under direct staff costs. Staff travel should not be considered as a direct staff cost. It can be considered as an indirect cost.

Staff can be shared between more than one operation, as long as they are wholly on Structural Funds activity. For staff costs shared between operations but which are still 100% on European Structural Fund activity these can be apportioned according to the budget splits relating to the applicable Operations.

2.2.2. Indirect Costs

**Indirect costs** on the other hand, are usually costs which are not or cannot be connected directly and exclusively to an individual activity of the entity in question. Such costs would include administrative expenses, for which it is difficult to determine precisely the amount attributable to a specific activity (for example
premises costs, management costs, recruitment expenses, costs for the accountant or the cleaner, telephone, water or electricity expenses and so on).

Practical examples of calculating flat rate models are included in the Annex A to the National Rules.

Please refer to individual eligible cost guidance within Section 4 of the National Rules.
SECTION 3 - ACTUAL COSTS

3.1. Actual costs can only be utilised under the following options:

- procured costs (see section 1);
- grant schemes/grant payments;
- wage subsidy schemes;
- purchase of land (as per Article 69, Paragraph 3 of EC Regulation 1303/2013, only up to 10% of total eligible expenditure for the operation is eligible);
- purchase of real estate (as per Article 69, Paragraph 3 of EC Regulation 1303/2013, only up to 10% of total eligible expenditure for the operation is eligible).

Actual costs will require a full and verifiable audit trail.

Expenditure paid out through procurement and grant schemes should be claimed as actual costs and should not incur any flat rate. Procured activity should also not use unit cost models - tenderers can be invited to bid for contracts on a unit cost price basis but these costs cannot be predetermined.

<table>
<thead>
<tr>
<th>Example (ESF)</th>
</tr>
</thead>
<tbody>
<tr>
<td>If a beneficiary implements a training course via public procurement, it is possible that in the call for tenders the beneficiary will ask the bidders to make a price offer on the basis of a unit cost per trainee gaining certification at the end of the course.</td>
</tr>
<tr>
<td>The terms of the contract can therefore be: one trainee certified = £1,000. If, at the end of the course, 10 trainees are certified, the beneficiary can declare £10,000 of eligible expenditure to the managing authority.</td>
</tr>
<tr>
<td>This £10,000 will be considered as real cost based. Therefore, a control or audit of this expenditure will consist in a check of the public procurement procedure and observance of the terms of the contract (in this example, that there is proof of a trainee certified for each unit cost paid). The underlying costs of the training (renting of facilities, staff costs…) will not be checked as the contract does not provide for reimbursement on this basis.</td>
</tr>
</tbody>
</table>
SECTION 4 – ELIGIBILITY OF EXPENDITURE

4.1. Eligible Expenditure – Capital Projects

4.1.1. Purchase of Land and Real Estate

Article 69 of the Council Regulation 1303/2013 relates to the purchase of land not built on and real estate which is eligible for support under the following circumstances:

- there is a direct link between the land purchase and the objectives of the operation co-financed;
- the purchase cost may not represent more than 10% of the total approved eligible costs of the operation, or 15% for derelict sites or those formerly in industrial use which comprise buildings. In exceptional and duly justified cases this limit may be raised above the thresholds for operations concerning environmental conservation;
- a certificate is obtained from an independent qualified valuer or duly authorised official body confirming that the purchase cost does not exceed the market value.
- only expenditure incurred and defrayed within the eligible programme period can be taken into account in this calculation, i.e. from 1 January 2014;
- the date the land was acquired is clearly indicated and evidence of this provided as an enclosure to the application form; and
- national or Community grants have not contributed towards its purchase and/or development.
- the land or real estate is used for the purpose and for the period decided by the MA in line with EC Regulation 1303/2013, Article 71.

4.1.2. Pre-Contract and Contract Implementation Costs

Pre-contract works incurred and defrayed within the eligible programme period (i.e. from 1 January 2014) including design, bills of quantity and tender preparation are eligible. This does not include project feasibility studies, which are ineligible.

The following costs can be included as pre-contract costs:

Site Investigation: This should take account of specialist investigations required to identify contamination and recommend particular treatments etc.

Site Decontamination: Specialist treatments to clear a site of particular contamination and dangers.

Site Preparation/Clearance: This should include demolition works and the general preparation of sites, which is not part of specialist decontamination works.

Site Servicing: This may include the following elements:

The provision of external utilities such as telecommunications, electricity and gas provision to the entire site and / or building
The provision of water and sewerage services within the site / project boundary
The construction / improvement of access roads and junctions within the site boundary
**Preliminaries:** As detailed in the Bill of Quantities.

Planning and Building Warrants

**Main contract works** incurred and defrayed within the approved lifetime of the operation are eligible.

The following costs can be included as **main contract works**:

Internal Services: This should include the provision of services/utilities within a building such as heating, lighting, plumbing and telecommunications.

Main Building Contract Works: This may include the following elements of work:

- External/structural refurbishment of existing premises
- Internal sub-division of existing premises
- New build premises
- External decoration and associated works as part of a larger project
- Internal decoration and associated works as part of a larger project

**Main Environmental Contract Works:** This may include the following elements of work:

- Hard and soft landscaping as part of a larger industrial/commercial development
- Hard and soft landscaping as part of a larger tourism/cultural development
- Hard and soft landscaping to promote environmental sustainability
- Street furniture and lighting
- Traffic management and urban centre regeneration works
- Creation and improvement of footpaths
- Creation and improvement of cycle paths
- Improvements to inland waterways

**Project Management and supervision:** Staff costs associated with the implementation of the project works, including Clerk of Works are eligible.

**Security Provision:** This should only include essential security provision, which will ensure the success of the wider project.

**Signage:** This should include relevant signs including those acknowledging the contribution of the Structural Funds to the project as per the Publicity Guidance.

**Specialist Treatments (as part of a Larger Project):** This should cover any specialist treatments not included under other headings such as:

- Stone cleaning;
- Floodlighting;
- Asbestos removal;
- Damp and rot;
- Special needs accessibility.

Applicants should specify the type of treatment(s) in an appendix. If treatments are associated with listed buildings they should be in accordance with the guidelines set down by Historic Scotland.
4.1.3. Public Administration Expenditure Relating to the Execution of Projects

The following expenditure of public administrations is eligible for co-financing if it relates to the execution of a project provided that it does not arise from the statutory responsibilities of the public authority or the authority’s day-to-day management, monitoring and control tasks.

- Costs of professional services rendered by a public service in the implementation of a project. The costs must either be invoiced to a final beneficiary (public or private) or certified on the basis of documents of equivalent probative value which permit the identification of real, actual and auditable costs paid by the public service concerned in relation to that project.

- Costs of the implementation of the project, including the expenditure related to the provision of services, borne by a public authority that is itself the final beneficiary and which is executing a project on its own account without recourse to outside engineers or other firms. The expenditure concerned must be certified on the basis of documents which permit the identification of real costs paid by the public service concerned in relation to that project. On-costs / charge-out rates are ineligible.

4.1.4. Contingencies

Contingencies are an acceptable and reasonable cost at application stage. Where the contingency covers genuine, unforeseen eligible expenditure, the costs should be reported against the appropriate, approved expenditure heading with a full explanation provided as a separate attachment to the claim.

4.1.5. Retentions

The retention must be paid within the eligible expenditure period of the Programme, and defrayed no later than final claim stage.

4.1.6. Purchase of Equipment

For vocational training and research and development facilities, essential items of equipment for the sole purpose of project delivery such as information technology equipment, research equipment, some teaching furnishings, machinery for skills enhancement delivery may be considered. The eligibility of such items will be appraised on an individual project basis.

4.1.7. Moveable Infrastructure – Fixtures and Fittings

Fixtures and fittings are only eligible if they are purchased for and used specifically by the operation. Ideally, this would form part of the initial ‘fit out’ of eligible premises. The eligibility of such items will be appraised on an individual project basis. For example:

- for vocational training and research and development facilities essential items of equipment for the sole purpose of project delivery such as information technology equipment, research equipment, teaching furnishings, machinery for skills enhancement delivery; and
• for community development, essential fixtures and fittings directly related to the sole purpose of the project may be considered.
• for sustainable transport operations purchase of bikes may be eligible if they are a key component of the operation. Prior agreement must be obtained from the Managing Authority.

In cases where items of equipment have been purchased, an inventory or asset register must be retained for audit purposes.

4.1.8. Purchase of Second-Hand Equipment

The purchase costs of second-hand equipment are eligible for co-financing by the Structural Funds under the following conditions:

• the seller of the equipment provides a declaration stating its origin, and confirm that at no point during the previous 10 years has it been purchased with the aid of national or Community grants;

• the price of the equipment should not exceed its market value and is less than the cost of similar new equipment.

4.1.9. Marketing

Costs associated with the development and advanced marketing of the project. A copy of the costed marketing strategy may be required as justification.

Materials must acknowledge the contribution of the Structural Funds to the project as per the Publicity Guidance.

4.2. Eligible Expenditure – Revenue Projects

The following guidance applies to eligible direct costs for flat rate models and actual cost models where applicable (see chapter 2. Where the costs below are not 100% attributable Structural Funds activity, they would be deemed indirect and may be covered by the appropriate flat rate model.

4.2.1. Direct Staff Costs

Direct staff costs are eligible for personnel directly engaged in a project for 100% of their contracted hours, whether full or part-time. Direct staff do not need to be in place for the full duration of an operation, as long as their role is justified and they are 100% on an operation for the period they are required. Direct staff can be shared between more than one operation as long as they are wholly on Structural Funds activity. For staff costs shared between operations, but which are still 100% on European Structural Fund activity, these can be apportioned according to the budget splits relating to the applicable Operations.

A job description and contract or letter which details that they are solely involved in Structural Funds activity should be retained and made available for audit purposes. Additional evidence will also be required during the auditable life of the operation to demonstrate. Significant changes in key personnel requires prior authorisation from the Managing Authority.
All staff costs included in a project should be in accordance with the following conditions:

- Staffing costs should include gross pay, employer's National Insurance and superannuation contributions and any eligible island allowance (commission and benefits in-kind – such as bonuses – are ineligible).

- Where an employer pension scheme does not provide the other benefit commonly found in a superannuation scheme, namely life insurance, any separate, standalone insurance policy arranged to provide a separate Death In Service insurance would be eligible, provided this is to compensate for the absence of life cover in the standard superannuation scheme, that it is open to all and does not duplicate other cover.

- Only actual costs can be included in claims.

- There should be a clear audit trail for staff costs through payroll records, via BACs to the bank statement.

- Consultancy fees and sub-contractor fees should not be included in staff costs.

4.2.2. **Consultancy Fees and Contractors’ Charges**

Costs for work undertaken by an independent consultant or sub-contractor will only be eligible if the work is essential to the project and the costs are reasonable.

- Consultants/Contractors must be appointed in line with relevant standing orders and public procurement rules and regulations.
- De minimis – provided any engagement is for a limited period only and charges do not exceed £500 per day. Justification of these costs will still be required.
- Mentors – only real costs associated with travel, any necessary overnight accommodation and materials are eligible.
- Costs associated with payment of consultants that provide support in completion of application/claim forms and with management fees are not eligible.

4.2.3. **Project Evaluation Fees**

Costs of independent evaluations will be eligible if the work is essential to the project and/or a condition of grant (see Consultancy Fees above).

4.2.4. **Staff Travel**

Staff travel costs must be directly related to and essential for the effective delivery of the project. Certified travel claims must be retained. Actual costs up to a maximum of mileage at the public sector rate per mile (or comparable) or economy class travel on public transport must be claimed.

4.2.5. **Premises Costs**

Premises costs are only eligible where they demonstrate a real additional cost and these are fully and directly related to the delivery of Structural Funds activity. Project expenditure should be over and above existing operating costs, e.g. if you have to rent additional premises. Apportioned premises costs are not eligible.
unless premises are 100% used for Structural Funds activity and are shared between operations. Apportionment methodology should be agreed with the MA.

Eligible costs include the actual cost of rent, rates, heat, light, telephone/internet charges, cleaning and service charges associated with the premises.

Notional rental charges where the applicant owns the premises, or occupies premises rent-free, are ineligible.

4.2.6. Insurance

Similar principles apply. Insurance of buildings, contents and for public liability are eligible provided it can be clearly demonstrated that these directly relate to the delivery of the project and are additional. Professional indemnity is also eligible provided it is essential to the delivery of the project and additional to standard provision that organisations / individuals could be expected to hold.

4.2.7. Marketing

This may include costs related to appropriate and proportionate aspects of marketing specific to the project on, for example, design and production of marketing materials, facilitation of appropriate conferences and seminars, and targeted advertising campaigns.

To be considered eligible, any items of marketing claimed must contain the appropriate acknowledgment for ERDF/ESF in line with the Publicity Guidelines. Examples should be kept for audit purposes.

4.2.8. Other Eligible Project Costs

This may include software, stationery, teaching materials, postage, photocopying consumables and other reasonable costs where it can be clearly demonstrated that these are directly related and essential to the delivery of the project.

4.2.9. Repairs and Maintenance

These costs must relate to equipment specifically included as eligible items of expenditure within the approved application and within the lifetime of the project (i.e. start and finish date). Repairs and maintenance are only eligible for Structural Fund support in the following circumstances:

- Where the equipment has been accepted as eligible for depreciation under the project, or
- Where the equipment has been accepted as eligible for leasing and the applicant is responsible for repairs and maintenance.

4.2.10. Depreciation

Please see Article 69(2) in EC Regulation 1303/2013 – specific eligibility rules for grants and repayable assistance, which gives details on depreciation.

Depreciation is eligible to be claimed for items of equipment purchased which are essential to, and solely used for, project delivery. Depreciation must be calculated in line with the organisation’s depreciation policy:
e.g. Cost of laptop £750. Depreciation policy states IT equipment over £500 is depreciated over 3 years. Therefore eligible depreciation cost is 68.5 p per day x no. of days in claim period.

Claims for depreciation should be based on the original purchase costs of the owned equipment (excluding any additional costs such as delivery or installation) Depreciation may be claimed on second-hand equipment.

Depreciation cannot be claimed in respect of equipment/goods, which have benefited from national or European grants at the time of their purchase.

Documentation showing how depreciation costs have been calculated must be kept for audit purposes. This will include: invoices; payments records including BACS lists and bank statements; descriptions and location of the items purchased; the method of depreciation; asset register and, where relevant, the estimated residual value.

4.2.11. Leasing

Leasing is eligible for support. This must be agreed with the MA prior to being claimed.

4.2.12. Vehicles

The table below shows provides more details on the eligibility of costs relating to vehicles:

<table>
<thead>
<tr>

</tbody>
</table>

X ineligible
✓ eligible
* personal vehicles used on official business can be paid mileage
* depends on terms of lease. Normally expect leasing costs to include these.

Leasing costs should not exceed the original value of the asset.

4.3. Eligible Expenditure – ESF Participant Costs

4.3.1. Wage Subsidies

Wages for wage subsidy schemes are eligible and include gross salary, Employers’ National Insurance and Superannuation costs, under the following conditions:

- Participants should be provided with a contract of employment.
- Wages should comply with minimum wage requirements. With prior approval of the MA, it may be acceptable to exceed the minimum.
Wage subsidies may be used to support either temporary or permanent jobs but must lead to enhanced employability or stable employment, including self-employment.

ESF cannot be used to support or substitute for permanent jobs in the public sector, e.g. local or central government, or health authorities.

Projects delivering wage subsidy actions must be able to demonstrate an improvement in the trainee’s job skills by the end of the action or project.

A maximum of 50% of costs can be claimed. State Aid limits may also apply and must be checked.

A wage subsidy scheme should run for no longer than 12 months.

Documentation will be checked to final participant Level.

Where the participant also receives formal training, wage subsidy payments for this period are eligible. Participants must be provided with both a contract of employment and a training agreement fully detailing the purpose, length and timescales of training.

4.3.2. Financial Incentives

Financial incentives to encourage attendance and/or completion of training courses may be accepted in duly justified cases in terms of the participant.

4.3.3. Participant Allowances

Participant allowances can only be used to purchase specialist items, specifically related to delivery of the project, but not for general one-off costs (e.g. purchase of a suit to attend an interview or tools).

The eligibility of items is dependent on the employment status of the participant.

Participant travel and subsistence costs must be directly related to and essential for the effective delivery of the project. Certified travel claims must be retained. Actual costs, up to a maximum of mileage at the public sector rate per mile or economy class travel on public transport must be claimed. In duly justified cases, other means of travel may be accepted (e.g. taxi). Claims should either be submitted on the basis of actual expenditure and supported by receipts or consistent with recognised standard subsistence rates.

4.3.4. Dependent Care

Actual costs towards the provision for dependents to allow participation in operations is eligible where a full evidence trail can support the costs.
SECTION 5 – INELIGIBLE COSTS

This list is intended as a point of easy reference. Definitive guidance is to be found in earlier sections of this document.

5.1. Financial and Other Charges and Legal Expenses

- Accounting costs, preparation etc of annual accounts, year-end auditing
- Bank charges on accounts
- Costs of guarantees provided by a bank or other financial institution
- Financial charges
- Debit interest, charges for financial transactions, foreign exchange commissions and losses, and other purely financial expenses are not eligible for co-financing by the Structural Funds
- Loan charges – the nature and amounts of any loan charges included in the overall project costs should be brought to the attention of the MA
- Service charges – arising on leases and hire purchase arrangements
- Costs resulting from the deferral of payments to creditors
- Costs involved in winding up a company
- Bad debts
- Fines, financial penalties and expenses of litigation
- Legal fees for advice, notary fees and the costs of technical or financial expertise

Some of these costs may be eligible if they are directly linked to the operation and are necessary for its preparation or implementation or, in the case of accounting or audit costs, if they relate to requirements by the MA and must be agreed with the MA prior to being claimed.

5.2. Equipment

The purchase of equipment or furniture on a revenue project is ineligible.

5.3. Moveable Infrastructure

Purchase of moveable infrastructure, such as motor vehicles, ferries, is ineligible.

5.4. Recoverable VAT

Recoverable VAT is not eligible.
5.5. **Education Maintenance Allowances**

EMA payments which are 100% re-imbursted are not eligible for ESF support.

5.6. **Staff Related Costs**

The following staff related costs are not eligible:

- Staff that are not involved in project delivery for 100% of their contracted hours
- Staff not directly attributable to Structural Funds Activity
- Staff training
- Redundancy payments
- Payments for unfunded pensions
- Maternity, adoption or sick pay
- First aid or keyholder allowances
- Bonus or commission payments

5.7. **Other Ineligible Costs**

- Expenditure defrayed out with the eligible programme period, including site acquisition
- Costs related to research or studies carried out in respect of the project prior to the official project start date
- Feasibility studies (some pilot studies will be eligible e.g. feasibility and initial development work under low carbon operations – to be discussed and agreed with MA)
- In-kind costs (excluding land or real estate)
- Gifts
- Repairs and maintenance unless covered by the eligible cost description
- CCTV for town centres and/or as a stand-alone initiative
- Civic sculpture
- Compensation for loss of office
- Costs that are a statutory requirement, including maternity/paternity pay, statutory sick pay, improvements to buildings as a requirement of changes to legislation e.g. Disability Discrimination Act.
- Any actions previously funded by European Structural Funds under other Programmes or EU-funded initiatives
- Purchase of ID
- General subscriptions or memberships of trade or professional organisations which are not specific to the operation
Annex A

Calculating Payments Under the Flat Rate Model

In the flat rate model the agreed intervention rate (up to 40% LUPS, up to 50% H&I) is applied to the total expenditure. The flat rate is used as a means of calculating the total expenditure on the basis of direct costs without the need to prove the expenditure for indirect costs.

Example of 15% Flat Rate

<table>
<thead>
<tr>
<th>Description</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lead partner management direct staff costs (Verified through audit)</td>
<td>£100,000</td>
</tr>
<tr>
<td>Application of 15% flat rate to determine all indirect costs</td>
<td>£15,000</td>
</tr>
<tr>
<td><strong>TOTAL EXPENDITURE</strong></td>
<td><strong>£115,000</strong></td>
</tr>
<tr>
<td>ESF Grant Payment at 40% intervention rate (LUPS)</td>
<td>£46,000</td>
</tr>
<tr>
<td>Or</td>
<td></td>
</tr>
<tr>
<td>ESF Grant Payment at 50% intervention rate (H&amp;I)</td>
<td>£57,500</td>
</tr>
</tbody>
</table>

Example of 40% Flat Rate

Strategic Intervention - Employability Pipeline with 4 Operations (H&I Area)

**Operation A - Lead Partner Management**
Includes: 3 members of compliance staff working on ESF compliance full-time, 100%
Funding Model: Flat Rate (direct staff costs plus 15%)

- **Staff Cost** = £400,000
- **Plus 15%** = £60,000
- **Total Expenditure** = £460,000
- **ESF Grant** = £230,000
(50% of Total Expenditure)

**Operation B - Adviser Support**
Includes: 10 members of staff, 3 on part-time contracts) working on participant delivery, in-house, full-time, 100%
Funding Model: Flat Rate (direct staff costs plus 40%)

- **Staff Cost** = £1,000,000
- **Plus 40%** = £400,000
- **Total Expenditure** = £1,400,000
- **ESF Grant** = £700,000
(50% of Total Expenditure)

**Operation C - Third Sector Delivery**
Includes: Third sector delivery of specific barrier removal services.
Funding Model: Procurement

- **Total Expenditure** = £200,000
- **ESF Grant** = £100,000
(50% of Total Expenditure)

**Operation D – Employer Recruitment Incentive**
Includes: 1 member of staff working with employers to set up and monitor the placements plus participant wage cost element at 50% of actual cost. As the operation doesn't have significant indirect costs associated with it a flat rate of 15% is applied to the staff cost.

- **Staff Cost** = £100,000
- **Plus 15%** = £15,000
- **Participant Costs** = £100,000
- **Total Expenditure** = £215,000
- **ESF Grant** = £107,500
(50% of Total Expenditure)

**Phase 1 Total Expenditure** = £2,275,000
**Phase 1 Total ESF Grant** = £1,137,500
(50% of Total Expenditure)
