

Beta Bugs

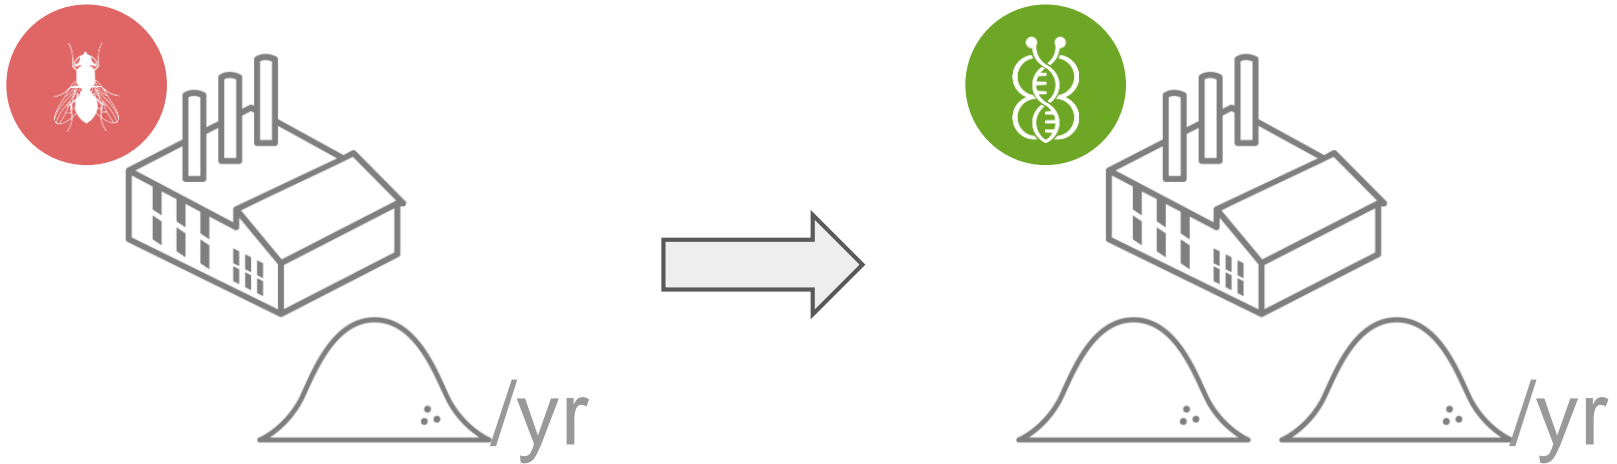

— Making Insects Better —

Our vision - making insects better

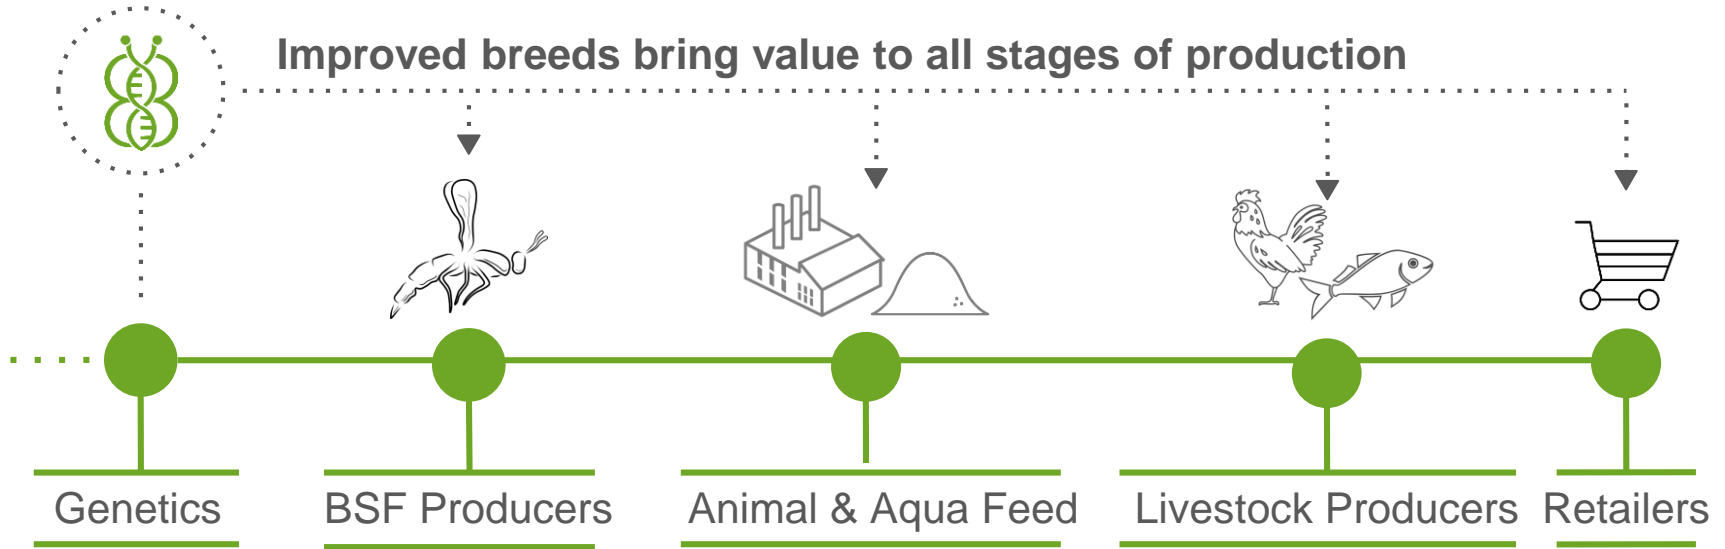

Beta Bugs is an insect breeding company creating new breeds of high performance Black Soldier Fly for the "insects as feed" sector. In the long-term our breeds will feed, fuel and supply the world's growing livestock and human population.

Our mission - Accelerating an entire industry

**Doubling an industry's capacity
without doubling the farms.**

How we see it - adopting a whole value chain approach

Beta Bugs - let's make insects better together

**Are you a BSF producer, feed manufacturer, livestock producer or retailer?
Get in touch to discuss building a breed for your needs.**
